

NSAIDS

Please stop taking all medications on this list 7 (seven) days prior to your surgery unless your surgeon, anesthesiologist, or primary care physician has directed you otherwise. Please contact our office if this should be the case. It is ok to take Tylenol (acetaminophen) for pain as long as you have no contradictions to its use.

If you have questions about any medication, please call our office at 541-780-6654.

This list contains a list of NSAIDs (anti-inflammatories) and their associated names. THIS LIST IS NOT ALL INCLUSIVE. Many topical pain creams contain NSAIDs. Contact your pharmacy or doctor if you have questions about the ingredients of the topical pain creams.
